

U. S. and Canadian Stations by Frequency

Wavelength, Call, Location, Power and Time Sharers Given

LEGEND

Please observe the following code:

* Channel shared by United States and Canada. The Canadian stations will be found following the United States stations of the same frequency. Expression "Kw" not used for Canada.

** Channel exclusively assigned to Canada.

CP—Construction permit authorized.

T—Transmitter location, specially given where it differs from main studio location.

Where two powers are given, larger is for daytime use.

Time-sharers are shown in parentheses for U. S. stations.

THE list of stations by frequency published herewith was corrected up to the moment of going to press. The list includes all broadcasting stations in the United States and Canada. The reason for consolidating them is that so many Canadian stations are tuned in that a United States list would require resort to a Canadian list to make the service complete, and that Canadian list might not be at hand.
