

# Here and There Among the Stations

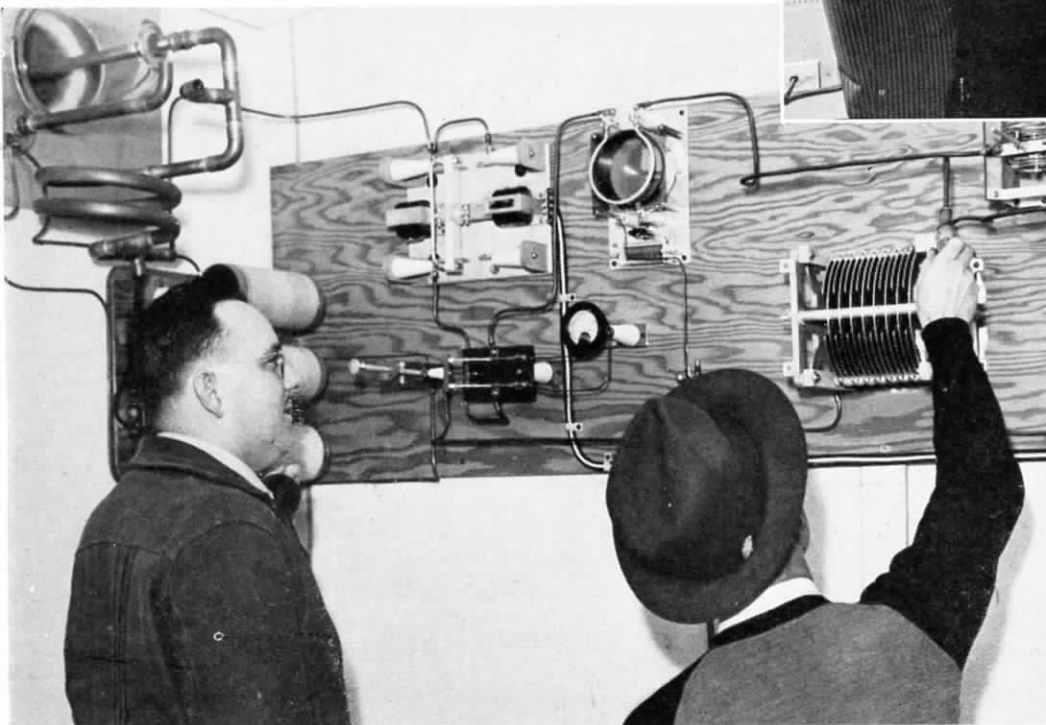

ABOVE: Six wire transmission line installed at WSYR, Syracuse. A complete description of this equipment appeared in the May issue of Broadcast News.

BELOW: KSFO's recording Equipment. R. V. (Doc.) Howard, KSFO's director of engineering and research, is very proud of RCA recording turntables installed in the KSFO studios. These two additional recorders, together with the associated, especially designed amplifiers, and other apparatus, make it possible at a moment's notice, to continuously record programs from any and all sources.

BELOW: KOIL checking equipment at the transmitter plant.

RIGHT: The 308-A Field intensity Meter mounted in a car which KOIL uses for checking. The gentleman in the photograph is Mark Bullock, Chief Engineer at KOIL.
