

RADIO PROGRAM FEATURES

AN OFFICIAL PROGRAM SERVICE

THE radio receiver is worth only what it receives. One of the main difficulties in broadcast listening is to determine just when the more popular programs are on the air. Most listeners miss as much as 50 percent of the worth-while programs for this reason. RADIO NEWS is therefore presenting this seventh instalment of a monthly broadcast schedule, listing day by day what is felt to be the most noteworthy programs on the air in the evenings, on Saturday afternoons and all day Sunday. The programs have been chosen by a committee of art, music and educational critics, as well as representative listeners. The programs listed are for the period of November 10th-December 10th inclusive. The listings include the name of the program, the time the program is on the air, the type of program, the name of the sponsor, the chain and the national stations through which it is transmitted. To use the lists one should refer to the day of the week and then run down the hours, marking off those programs you wish to listen to. If you want to find the time for a given program, the name of the program is shown in bold face and is easily picked out. The list is correct up to the day of going to press. Programs are sustaining, unless otherwise noted. All listings are in Eastern Standard Time. Deduct one hour for Central Standard Time, two hours for Mountain Standard Time, and three hours for Pacific Standard Time. All time is p.m. unless otherwise noted.
